

WHAT'S NEW FOR WRITE-ON

MAY 2005

RADIOACTIVITY ANALYSES FORM

Combined Ra 226 + Ra 228 (11503)

The MCL and DLR for Combined Ra 226 + Ra 228 (STORET # 11503) were inadvertently reversed but have been corrected as of April 22, 2005. They will now read:

MCL = 5

DLR = Blank

The downloadable hardcopies are correct and no changes have been made.

BASE, NEUTRALS AND ACIDS ORGANIC ANALYSES FORM

The DLR (Detection Limit for purposes of Reporting) of 5.00 ug/L has been removed from:

**N-Nitrosodi-n-propylamine (34428) and
N-Nitrosodiphenylamine (34433)**

The revisions have been made to Write-On and to the downloadable hardcopies.
